Services

Sand Blasting will prepare your parts for optimum powder adhesion and long-term paint performance by removing corrosion and other surface compounds.

Chemical Washing removes surface contaminants such as fine dusts and oil compounds that would reduce paint adhesion and performance. PSP uses environmentally safe, phosphate free pre-treatment solutions from DuBois.

Masking and thread protection will keep paint from covering critical threads and clearance parts. Please advise your technician if you require masking services.

FAQ's

Powder Coating is durable, attractive and cost-effective compared to traditional liquid coating options.

Powder coating paint is delivered ready for application and doesn't require complicated mixing prior to application.

Powder coats also achieve very good abrasion and chip resistant properties due to their 0.001-0.003" (mil) thickness.

Liquid finishes require multiple coats to obtain similar thickness which increases costs and processing times.

In addition to powder coatings physical superiority over liquid finishes, powder coatings are fully cured when removed from the curing oven. This means your project is ready for use and won't require any additional post-cure aging time.

About PSP

PSP Powder Coating is located 25 miles north of Portland, Oregon in St. Helens. Part of the Pacific Stainless Products family of companies, PSP Powder Coating is one of the Northwest's leading powder coaters.

Offering emergency services, state of the art equipment and unrivaled job flexibility, PSP Powder Coating is your single source for all your powder coating needs. Call us today for your free quote!

Choosing Powder

We use only premium quality paints from established suppliers such as Sherwin Williams, Cardinal, Tiger and Prismatic. If you have questions about choosing the right powder, please call us at 503-366-8298.

Ordering Info

Please disassemble your parts completely prior to delivery. Any disassembly of parts (i.e. seals, bushings, gaskets etc.) will be charged at \$65.00 per hour. Reassembly will also be charged \$65.00 per hour.

Parts cannot contain any body filler as these will ruin the coating. Some minor imperfections may be filled by the powder coating process. Please call 503-366-8298 for details.

Additional charges will apply to rush orders and for parts that remain in storage at PSP Powder Coating longer than 7 working days after completion.

Payment - we gladly accept Cash, Visa, MasterCard and Money Orders.
